

CLEAN TECHNOLOGY VENTURES SERVICES

THE FUTURE IS NOW

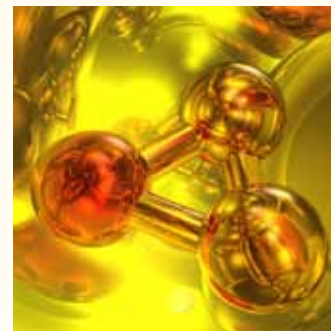

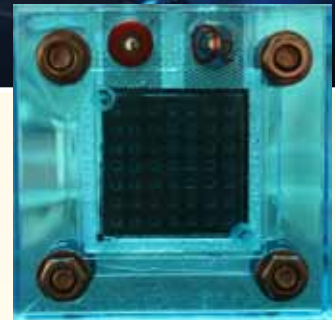

With the concern over carbon-induced global warming and traditional energy supplies coalescing into a consensus for action, many believe the United States is poised on the brink of an energy revolution. Whatever form this process will take, the engine room of change will be fueled by Clean Technology, the concept of knowledge-based products and services that improve productivity while reducing waste and pollution. From green building, smartgrid software and fuel cells to carbon management, biofuels and nanotechnology, Stoel Rives believes the future for clean energy ventures is now.

EXPERIENCE YOU CAN COUNT ON

While the opportunities are immense, the obstacles that confront every start-up venture remain. That's where our Stoel Rives Clean Technology attorneys come in. As a full service firm, we have extensive experience managing all aspects of a clean technology company's life cycle – from raw idea, protection of intellectual property, through angel and venture financing, pilot demonstration, product licensing, project development, project finance, sale or public offering.

Whether Utility-Scale or Start-Up – We Help You Grow

From green building innovators and fuel cell manufacturers to carbon sequestration and wave energy pioneers, we've helped clients overcome challenges unique to their particular geographic locations, technologies and facility designs. Our nationally-rated Renewable Energy practice, for example, has more than 30 years of experience working on siting and financing issues for key players in the biofuels, biomass, wind, solar, geothermal and wave energy industries throughout the United States and abroad.

In particular, our attorneys provide assistance in the following core clean technology categories:

- Corporate Finance/M&A
- Utilities and Regulatory
- Litigation and Dispute Regulation
- Project Development
- Intellectual Property

A Deep Industry Commitment

We've been bullish on the prospect for the clean technology industry since the beginning. With the acceleration of government and private investor involvement, we're even more confident in the industry's potential to help spur a true

energy revolution. We are ready to do our part. We actively sponsor collaboration between investors and start-ups through our sponsorship of groups like the American Council on Renewable Energy and Northwest Energy Angels. Many of our attorneys also

serve as leaders on these and other clean technology-related organizations, working at the forefront of legislative and regulatory streamlining efforts for the industry. To learn more, we encourage you to visit us at

www.stoel.com/cleantechnology.

REPRESENTATIVE TECHNOLOGIES

- Clean and Renewable Energy Technologies
- Green Building
- Carbon Management
- Smartgrid Software
- Energy Storage
- Advanced Materials
- Water Treatment
- Chemical Processing
- Nanotechnology
- Fuel Cells
- Alternative Vehicles
- Wave Energy

Stoel Rives' Clean Technology Group is proud to support the following industry organizations:

American Council on Renewable Energy (ACORE)
Clean Technology Alliance
Geothermal Energy Association
National Algae Association
National Hydropower Association
Northwest Energy Angels

Northwest Biofuels Association
Ocean Renewable Energy Coalition
Oregon Wave Trust
Renewable Fuels Association
Washington Clean Technology Alliance
